PROFESSIONAL EXPERIENCE

IMPACT KITCHEN [Mar 2024 – Present] **Toronto, ON**
Business Analyst *| Full-time | Hybrid* Sep 2025 – Present

- Translated reporting requirements from Finance, Marketing, Operations, and People & Culture into tailored dashboards and analytical solutions, aligning business needs with available data.
- Built financial and operational BI dashboards using NetSuite and SuiteQL, implementing custom data extraction and validation to replace manual daily and weekly sales reports with self-service analytics for Financial Analysts.
- Built a Power BI dashboard to compare product-level sales across restaurant locations, automating data preparation from scheduled Givex reports into a connected Google Sheet.
- Developed 15+ custom reports and dashboards in IBM Cognos Analytics using UKG data to support workforce monitoring, including turnover, retention, headcount, tenure, labour metrics, and compliance.
- Developed Python-based invoice extraction tools using pandas, OCR, and PDF parsing, reducing typical invoice reconciliation time from approximately 4 to 2 hours.
- Identified the root cause of a systemic payroll calculation issue by analyzing historical payroll data across multiple pay periods, supporting successful corrective system changes.
- Investigated general ledger discrepancies, payment irregularities, and chargeback patterns through cross-system reconciliation to identify underlying causes and support financial controls.

Earlier progression at Impact Kitchen: General Manager (Mar–Sep 2025); Guest Experience Manager (Sep 2024–Mar 2025); Guest Experience Manager on Duty (Mar–Sep 2024).

SCAP ANALYSIS **Bogotá, Colombia**
Data Analyst *| Part-time projects → Full-time client assignment | Remote* Jan 2021 – Nov 2021

- Cleaned and standardized customer datasets using SQL and R, improving data quality for customer segmentation and business analysis.
- Transformed retail sales data using Power Query and built Power BI dashboards with DAX measures to analyze SKU-level performance, supporting product assortment optimization and retail space allocation.
- Analyzed application logs using KQL in Microsoft Azure, collaborating with developers to investigate anomalies, system errors, and potential service disruptions.

KINESSO | IPG MEDIABRANDS **Bogotá, Colombia**
Data Analyst *| Full-time | Remote* Jan 2021 – May 2021

- Supported Marketing Mix Modeling (MMM) projects by analyzing seasonality, macroeconomic factors, industry trends, and other drivers of marketing and sales performance.
- Collected, transformed, and validated client and third-party datasets for statistical modeling, forecasting, and marketing optimization; used R, Python, and internal modeling tools.
